

# RAD Smart Socket Series with **Bluetooth**

The RAD Smart Socket Series uses RAD Torque's transducer technology combined with custom sockets to measure the torque applied to the socket during a torque cycle.

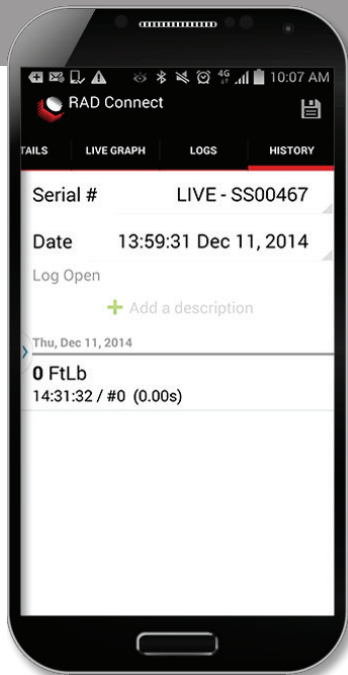

RAD's innovative design means the Smart Socket is no larger than a standard socket!

## Smart Socket FEATURES:

- Measures & displays peak torque.
- "Pass" or "Fail" indication.
- Data logging - download logs onto your device.
- Ideal on-site calibration tool.
- Bluetooth compatibility with Android\* devices & Windows PC's.

\*Requires Android 4.0 or above.

**Most Socket Sizes Available  
Upon Request**
