Quality, Service, Value

RAD TORQUE SYSTEMS

RAD torque wrenches are planetary gear reduction torque multipliers designed to deliver the most powerful, accurate and safe torque load of any torque multiplier on the market today. The extremely high torque and constant rotation make RAD tools ideal for virtually any bolting application you will encounter. Equal power in both forward and reverse allows more diversity for tough maintenance jobs. Our product lines, which include pneumatic, electronic, electric, and battery powered tools, are capable of achieving torque values up to 8500 ft.lbs and accuracy between 3 – 5%.

HYDRAULIC JACKING SYSTEMS

Compact and reliable our 40 to 175 ton jacking systems have proven to be the best available on the market today!

MORE POWER Featuring a manifold which allows you to operate two Lift Modules with a single pump.

MORE PRODUCTIVITY Once the load has been lifted, the pump module may be disconnected & used in another application.

Pump Carts

Swivel Saddles

Component Handlers

Jack Stands

Lift Module Manipulators

VALVE HARDWARE

Global Mining Products has over 70 years of hands-on experience and knowledge with Tire Inflating Products for the Heavy Equipment Industry. Specializing in LARGE BORE, SUPER LARGE BORE and SUPER EXCEL tire inflating systems for large and giant off-the-road tires, our goal is to supply the tire industry with superior products.

TIRE GAUGES

- 0-160 PSI - Red Line at 135 PSI
- Protective Rubber Boot
- Push Button Air Release
- Easy to Read Glow in Dark Face
- Quality Construction
- Accuracy +/- 1% of Full Scale

PT GAUGES

Specifically designed and developed as a simple, reliable and easy to read Tire Pressure and Temperature Tool.

NEW

The PT Gauge consists of a temperature gauge constructed of a special material which minimizes temperature transfer for an accurate tire temperature reading and an accurate air gauge protected by a rubber boot which eliminates contaminants, clogging and accuracy issues.

RIMS, WHEELS and ACCESSORIES

In this era of radialization, increased tire pressures, more powerful high torque trucks and loaders, longer hauls, higher speeds and heavier loads Wheel, Rim and Tire safety with longevity becomes of major importance.

Global Mining Products is proud of its 70 years of combined experience in manufacturing and supplying quality wheels and rims for these demanding applications.

TRAILER AXLES and HUBS

Global Mining Products specializes in custom Axles, Hubs, Drums and Brakes tailored to your specific applications from 20 to 65 ton assemblies.

ALSO AVAILABLE

- EXTRUDERS
- HEAT PADS
- SKIVERS
- TIRE LEVERS
- RASPS
- BUFFERS
- TIRE TREES
- CONTROL PANELS
- RUBBER ROPE
- PATCHES
- BEAD BREAKERS
- HAMMERS
- AIRBAGS
- RAMS
- INFLATION STANDS
- TIRE REPAIR MATERIALS
